# designed around PEOPLE, MOMENTS AND MEMORIES

Inspired by the timeless elegance of early 20th-century aesthetics and design, SIP explores the value of being together and the quiet beauty of shared moments.
An aperitif, a toast, an after-dinner digestif: simple everyday gestures that, when shared, become rituals. Moments in which time slows down, conversations unfold, laughter emerges, and stories and confidences find their space.
SIP was conceived to accompany these moments and reinterpret them through a contemporary lens. The collection brings together three complementary objects, designed to interact with one another and create a complete experience of conviviality.

**Three elements, one invitation:**
to pause, to connect, to celebrate the time spent together.

More than a collection of objects, SIP is an invitation to rediscover the value of small rituals:
to slow down, to share, and to make time together.

Designed by SITUER Milano, SIP is the result of an ongoing design research that explores the relationship between form, material and function. The collection further develops the studio's visual language through a precise balance of formal simplicity, distinctive character and constructive innovation.
Each object is defined by a minimalist yet unmistakable presence. Its essential geometry is not intended as an exercise in reduction, but as a way of giving the material a clear identity and allowing its inherent qualities to emerge.
At the heart of the collection is its construction technology, developed around the natural capacity of the material to bend. Here, bending becomes more than a manufacturing process: it becomes the defining gesture of the design.

## BAR CART

*Bar Trolley*
*finish: brushed steel*
*dimentions: 700x400x740mm*

# BAR CART

Throughout history, the bar cabinet has evolved alongside changing lifestyles, domestic rituals and the way we we live and share our domestic spaces. It gradually became an object intended to be seen, transforming the act of serving a drink into a moment of display.
It was during the 1950s that the bar trolley reached its most iconic expression. Freed from the confines of the traditional sideboard, it entered the room as an autonomous element. Bottles, glasses and accessories were no longer simply stored away: they became part of the domestic landscape, arranged with an effortless elegance that turned the bar trolley into a distinctive decorative presence.
BAR CART draws from this heritage to reinterpret the archetype through a contemporary design language.
The project explores formal simplicity combined with material innovation and a careful attention to detail, resulting in a piece that is both functional and visually distinctive.

More than a container or serving surface, BAR CART is conceived as an architectural element within the domestic space: a structure that organises objects, defines a place and invites interaction.
BAR CART therefore moves beyond its original function to become an expression of contemporary conviviality — a piece that carries the memory of an iconic typology while translating its spirit into a new, essential and distinctly contemporary form.

## BOTTLE DISPLAY

*Bottle rack set_4pcs*
*finish: brushed steel*
*dimentions: 250x100mm*

# BOTTLE DISPLAY

The BOTTLE DISPLAY is an essential piece which, through its shape and proportions, serves as a bottle rack.
Designed to display and organise bottles with discretion and elegance, it becomes a piece of furniture capable of defining the space without overwhelming it.
It can be used on its own or combined with the CAR BART and other pieces from the brand that share its highly recognisable aesthetic and structural character, creating coordinated and versatile arrangements.

It fits naturally into a variety of settings, from residential and commercial spaces to hospitality venues such as restaurants and bars.

## GLASS MARKER

*Glass marker set_6pcs*
*finish: different*
*dimentions: 40mm*

# GLASS MARKER

a way of being
INVOLVED,
RECOGNISED,
UNIQUE

To complete the collection, SITUER Milano presents its range of GLASS MARKERS: small decorative items designed to make every glass instantly recognisable.
A simple detail, yet one capable of adding character to the table and enhancing the guests' experience.

The possibility to customise their colours and engravings broadens their range of uses, transforming them into a distinctive feature for private events, special occasions and activities seeking to reinforce and convey their brand identity.

A small touch bearing the SITUER Milano signature, designed to leave its mark even in moments of sharing.

## DESCRIPTION

**Handcrafted**
_Entirely handmade with attention to detail.

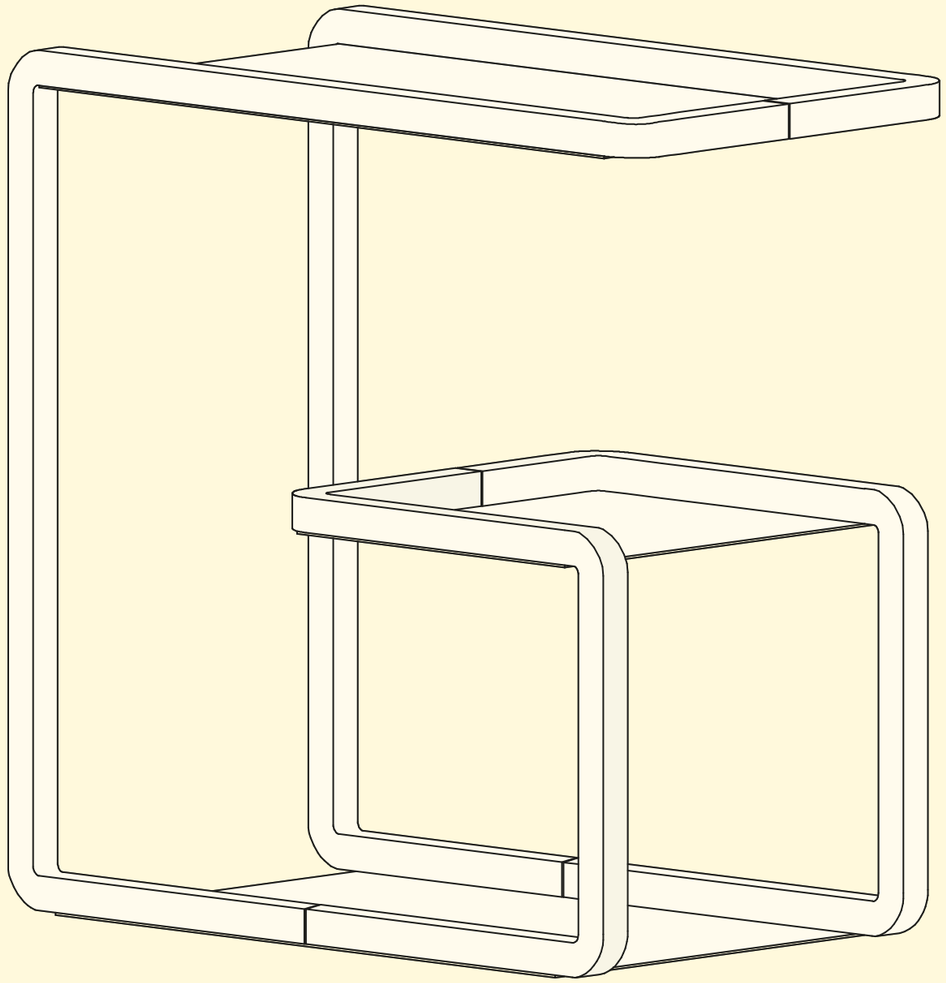

**Metal frame**
_Made from 30×30 mm metal box sections, shaped through the distinctive bending technique of situér milano.

**Structural composition**
_Four box sections, 1820 mm and 1240 mm long, each bent three times at 90°, form the main structure connected at the contact point by a 28×28 mm box section, fitted by interlocking.

**Top**
_Galvanised sheet metal, secured with self-tapping screws.

**Support**
_The structure rests on fixed feet and can be fitted with castors.

**Assembly**
_Delivered fully assembled, ready to use.
