ÉVIDÉ

Collection

FROM A HUMBLE MATERIAL, A PROTAGONIST

A HUMBLE MATERIAL, REDISCOVERED

The project is born from a precise idea: making stainless steel, a humble material, the core of the collection, drawing out its raw beauty and full aesthetic potential. A gesture that recalls the French concept of "*épater la bourgeoisie*", to impress the bourgeoisie: elevating stainless steel into an object of value.

PRESENCE, NOT CONCEALMENT

We did not want a collection that hides within a space, but objects with a strong presence, becoming protagonists of the environment that holds them. From this come the exposed joints, which bring the usually hidden to the surface as one of the pieces' most interesting details, a nod to Italian craftsmanship; and the perforated sheet metal, which lightens their presence while revealing the skeleton beneath.

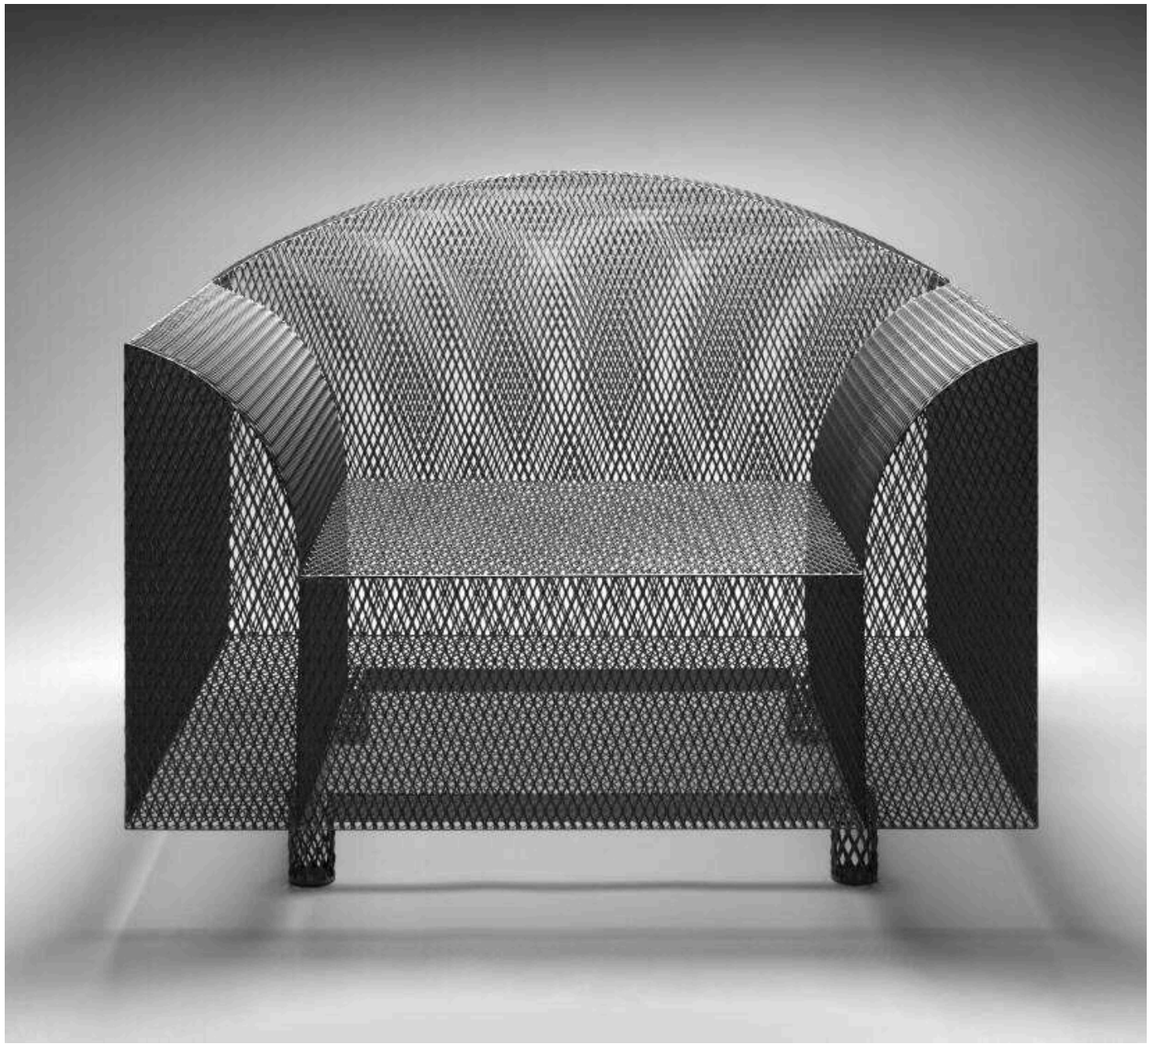

THE NAMING

The collection's name is ÉVIDÉ, French for "hollowed out". It captures the project's central gesture: subtracting material to create light, lightness and value, the same principle behind every perforation in the metal and every joint left in plain sight.

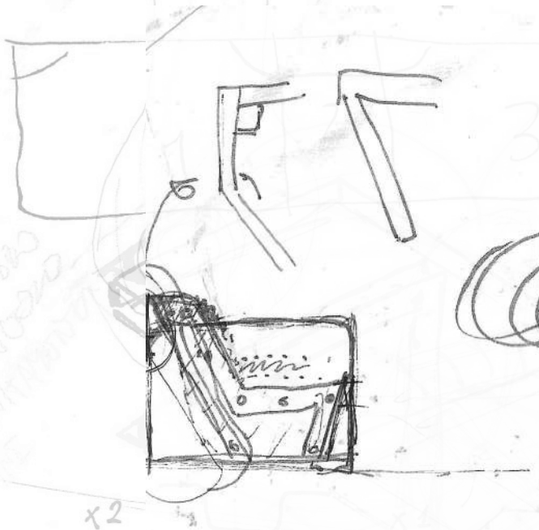

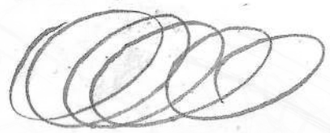

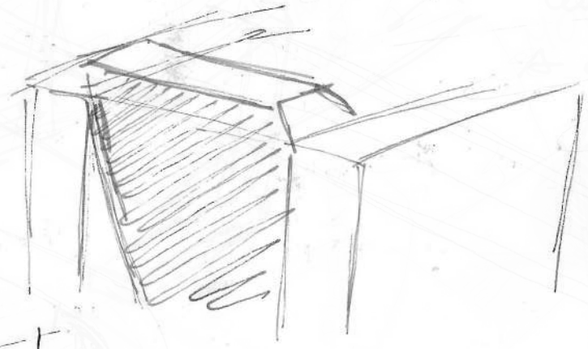

A DIALOGUE WITH THE MASTERS

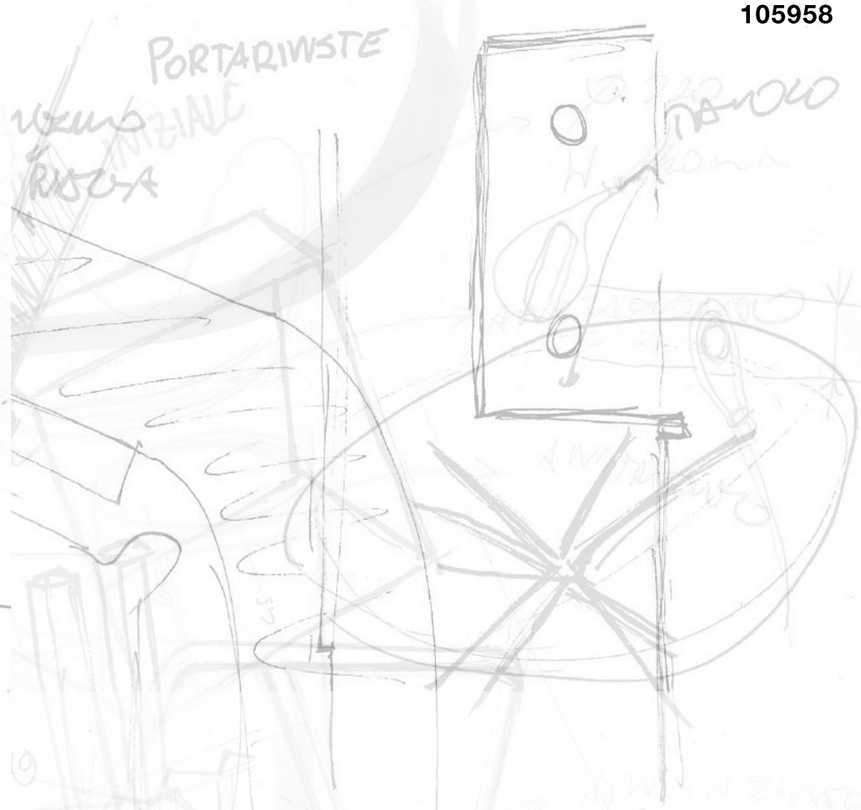

REFERENCES

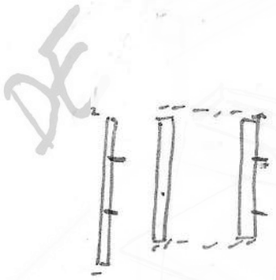

The inspiration comes from "How High the Moon", Shiro Kuramata's celebrated armchair made entirely of perforated steel mesh, which gave metal an unprecedented visual lightness. To this reference we added the brand's most identifying element, the Situèr fold, which we never wanted to remove. The meeting of these two factors gives rise to a quality that is unique and recognizable, belonging only to this collection.

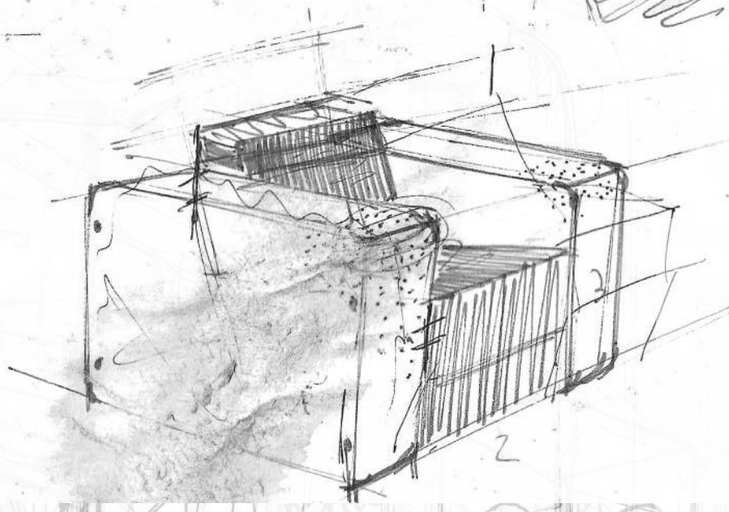

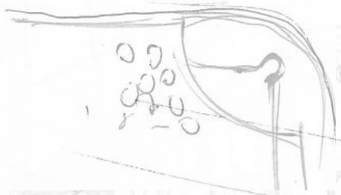

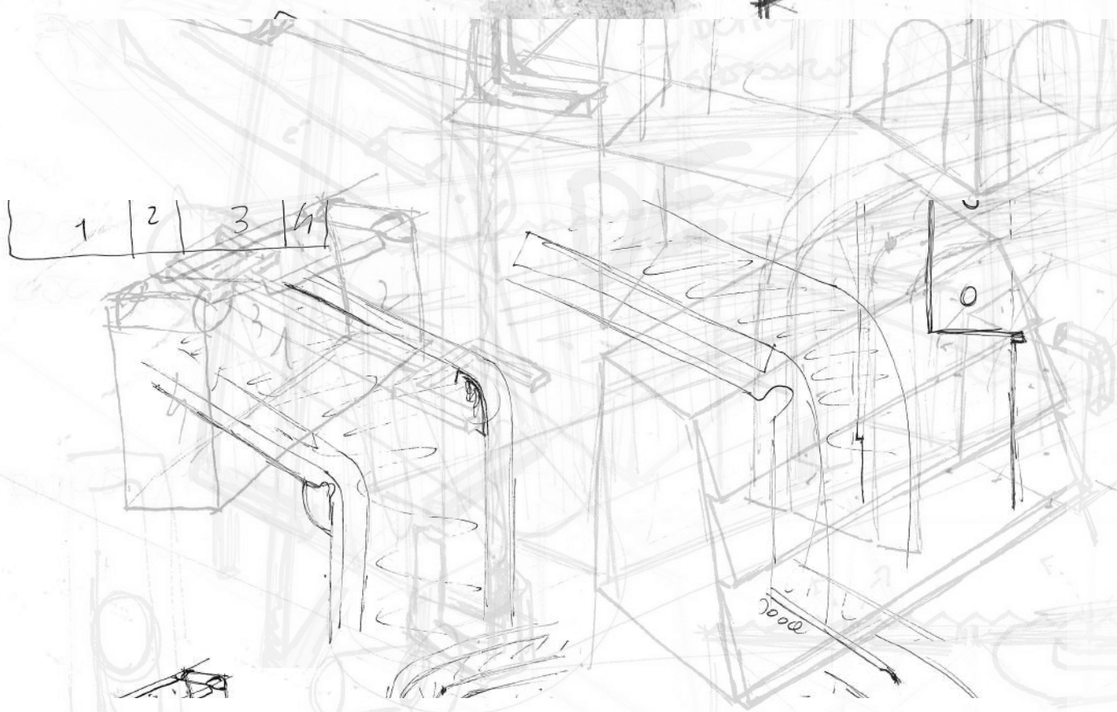

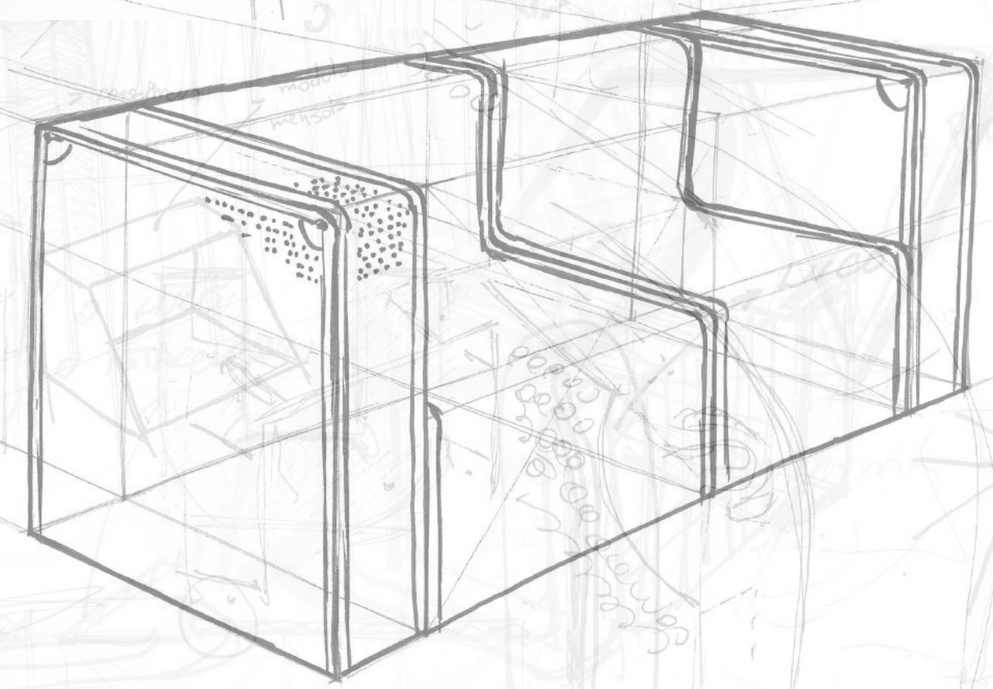

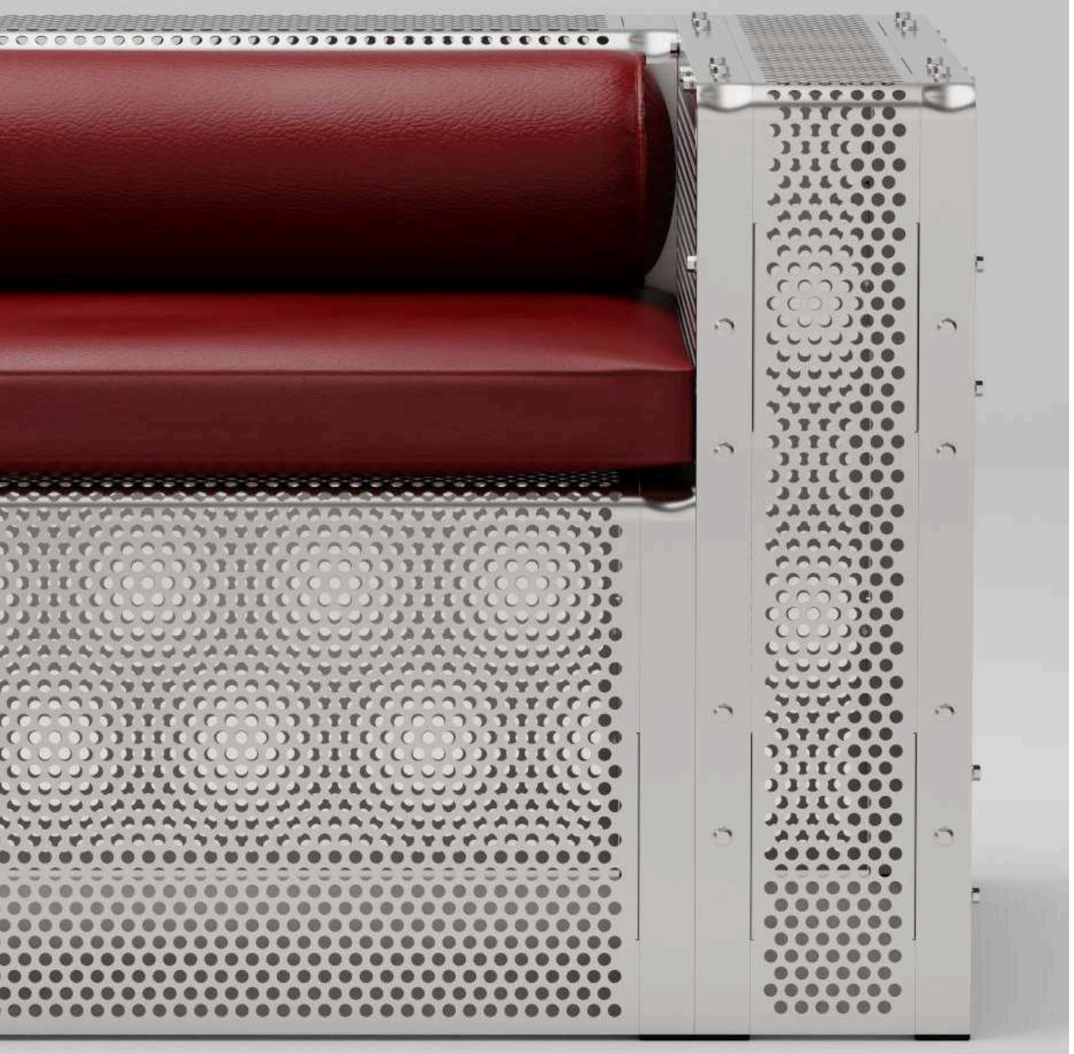

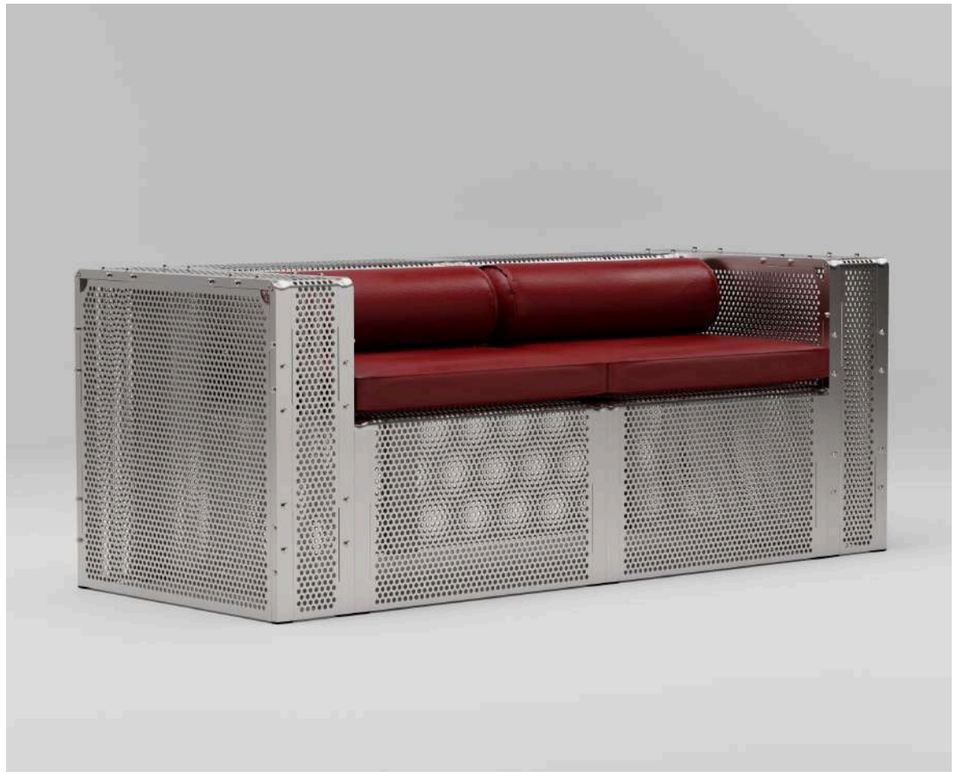

NAME: ÉVIDÉ Sofa
WEIGHT: ≈ 78.2 Kg
DIMENSION: 1800 x 695 x 720 mm

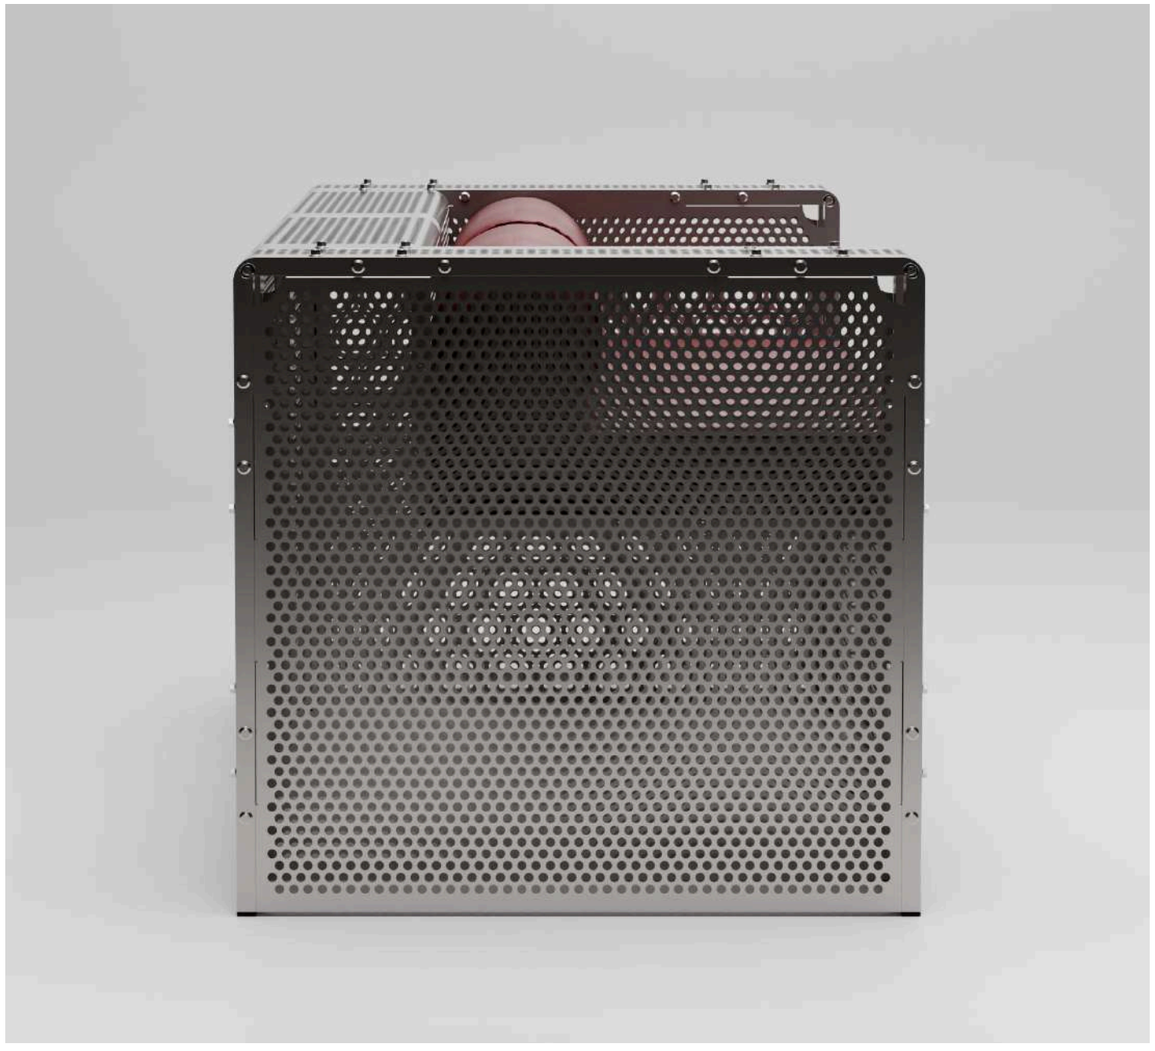

THE PROTAGONIST

The first piece of the collection is the ÉVIDÉ Sofa, the object that best embodies the values of our concept. It brings a strong presence into the room and becomes the protagonist of the space, around which everything else is organized. All the key elements of the project come together in it: the perforated sheet metal, the exposed metal frame, the modularity and the bolted joints. Every choice is consistent with the brand's identity and contributes to an image that is recognizable, elegant and honest.

01

MATERIAL AND STRUCTURE

Perforated sheet metal with a circular pattern: an elegant and sophisticated transparency. Beneath it, a frame of metal tubing reveals the signature SITUÈR fold. A distinctive feature that keeps the design consistent with the brand.

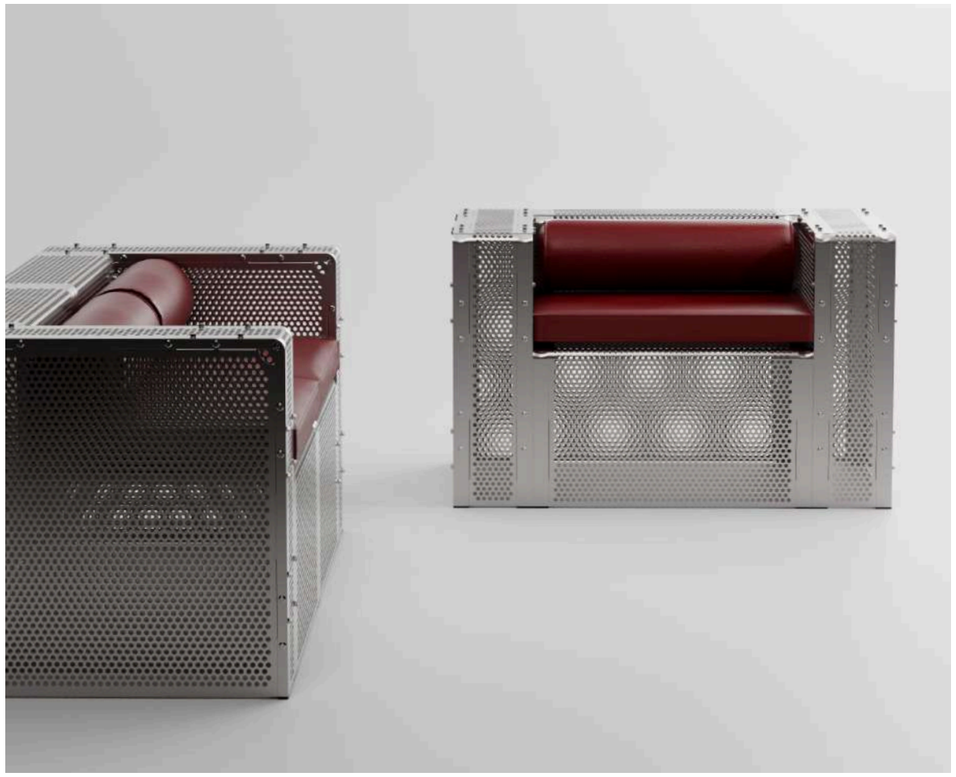

DETAILS

The exposed joints are not merely functional: the bolts become one of the most interesting details of the ÉVIDÉ Sofa. Completing it are the leather cushions, born from the desire to take a humble material and elevate it to a luxury good, echoing the concept of "impressing the bourgeoisie". The leather, known for its technical and aesthetic qualities, comes in a deep bordeaux red that enhances the elegant character of the piece.

02

03

MODULARITY

A system of screws and bolts makes it possible to start from a single module and expand according to the client's needs. No welding has been used: every joint is mechanical, in line with SITUÈR's core values.

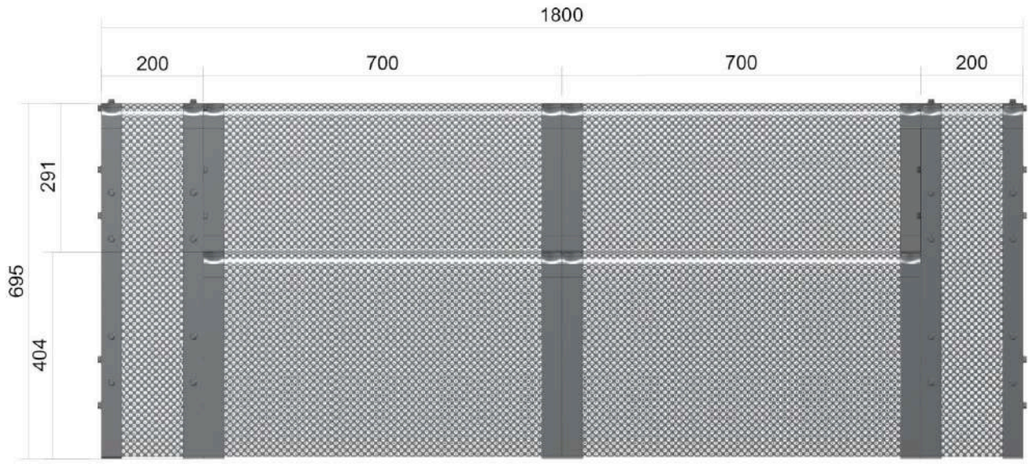

04

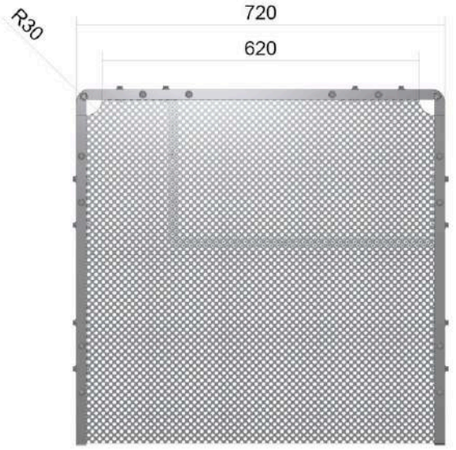

VERSATILITY

Without the cushions, the ÉVIDÉ Sofa takes on a new identity and adapts to many contexts: outdoor settings, showrooms, large spaces and trade fairs, as well as any use not strictly tied to interior design.

PERFORATED STEEL SHEET
PLASTIC RUBBER

NAME: ÉVIDÉ Lamp
WEIGHT: ≈ 17.4 Kg
DIMENSION: 1320 x 280 x 280 mm

THE CONCEPT

The second piece of the collection is the ÉVIDÉ Lamp, following the very same philosophy as the ÉVIDÉ Sofa. It too brings a strong presence into the room: its shape recalls an obelisk, a totem, asserting itself in the space through its verticality. At its center, the perforated sheet metal, and once again, no welding: a very small slit allows the module to close without any heat-bonded seam, ensuring consistency with the other products in the collection.

01

DETAILS

Here too we find the exposed bolts, which in this case become the lamp's actual feet. The base is reinforced to ensure stability, a crucial feature given the object's considerable height. Another distinctive detail is the slit that replaces welding: a solution that is as technical as it is aesthetic, becoming a recognizable feature of the piece in its own right. Finally, its strength is expressed through light: the perforated sheet metal creates puà-like lighting effects in the room, turning illumination into a scenographic element.

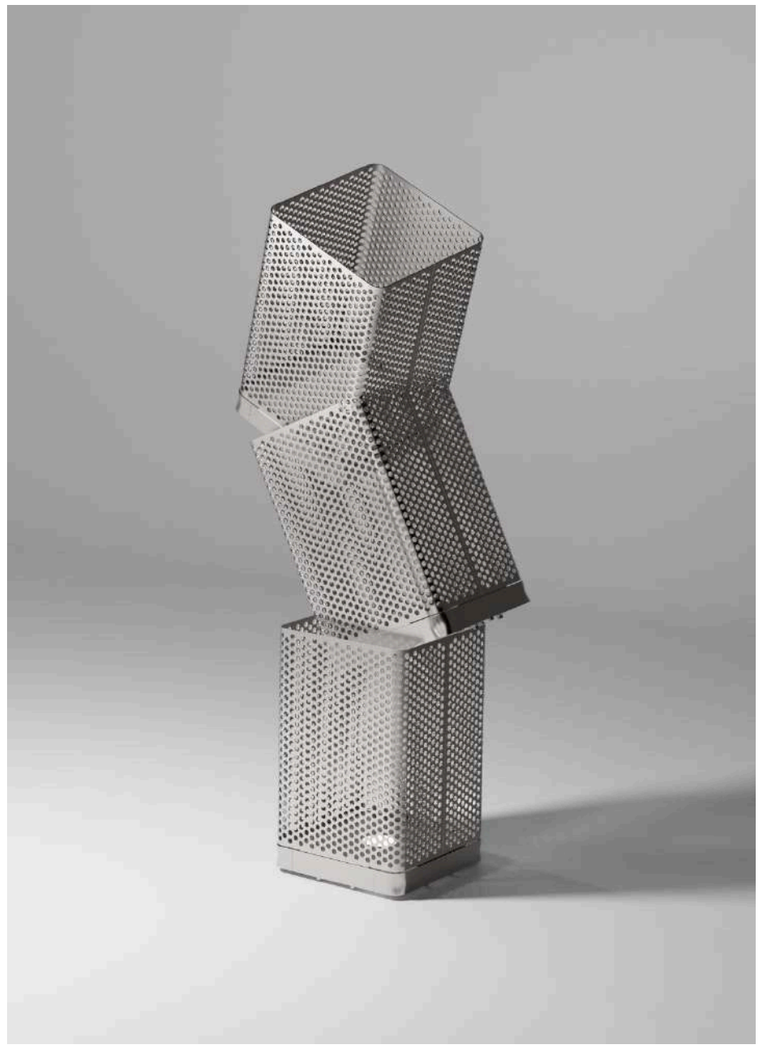

02

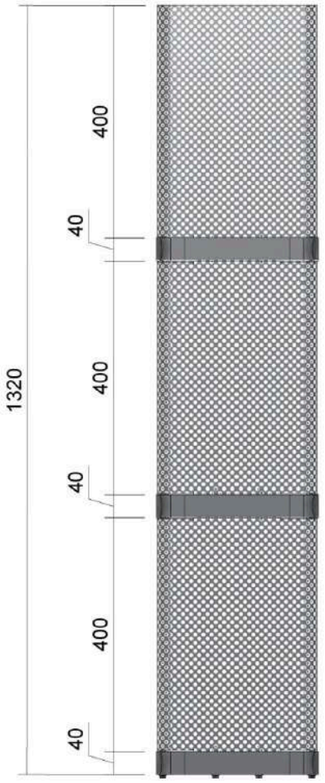

MODULARITY

Modularity is the ÉVIDÉ Lamp's signature feature.
In its largest version it is made up of three modules,
which can also be used in other compositions.

NAME: ÉVIDÉ Coffee Table
WEIGHT: ≈ 9.1 Kg
DIMENSION: 1200 x 400 x 740 mm

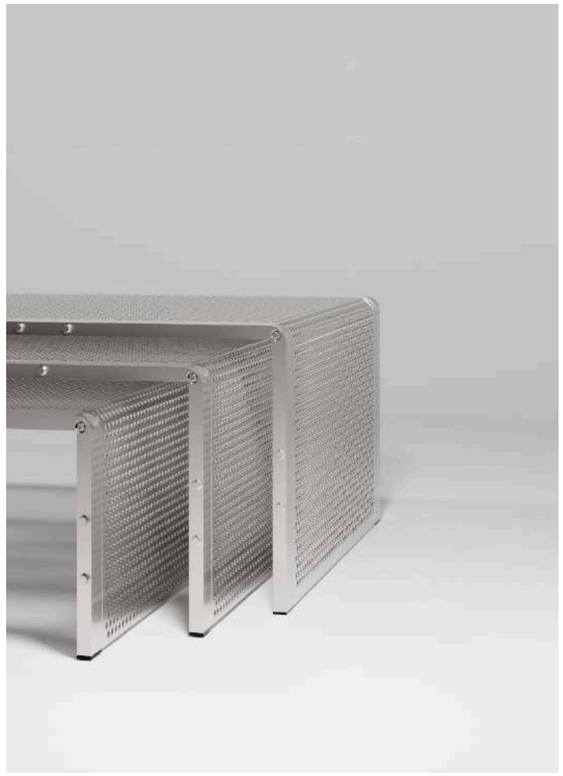

THE CONCEPT

The third and final piece of the collection is the ÉVIDÉ Coffee Table, sharing the very same philosophy as all the other pieces. Here too the concept is built on bolted assembly and perforated sheet metal, elements that ensure consistency with the rest of the collection and reaffirm its identity.

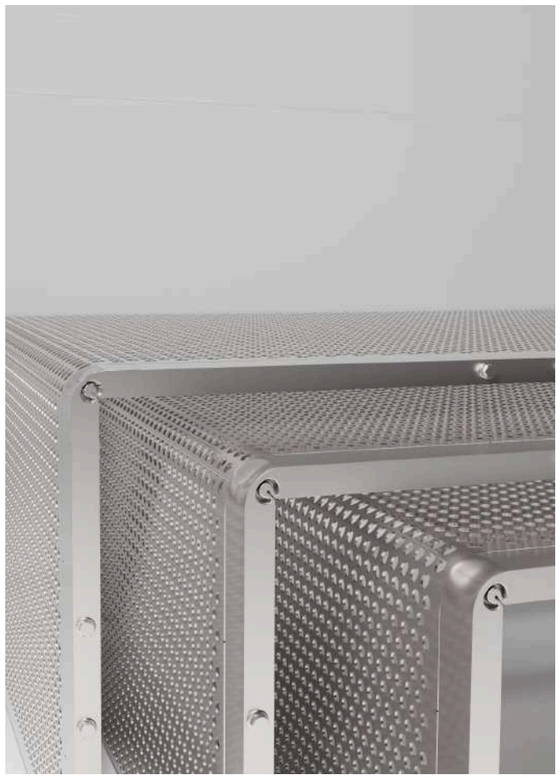

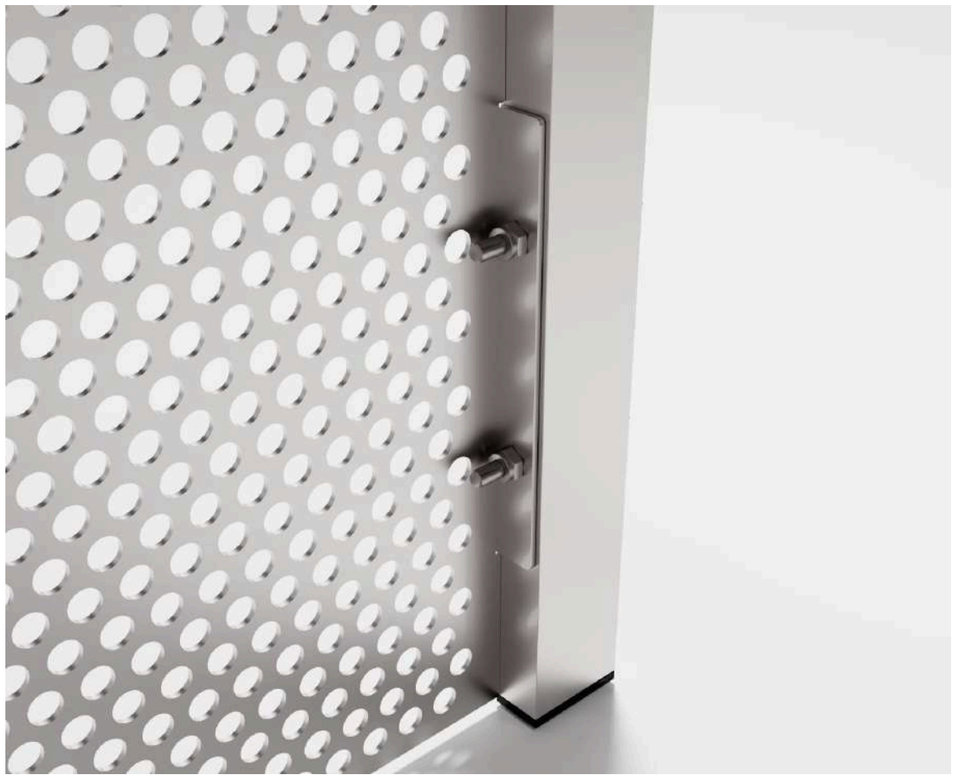

01

SIZES

Unlike the other pieces, modularity here is not intended in the strict sense: the ÉVIDÉ Coffee Table is not built by assembling multiple modules, but is instead available in three different sizes. This range makes it adaptable to a variety of situations, according to the client's needs.

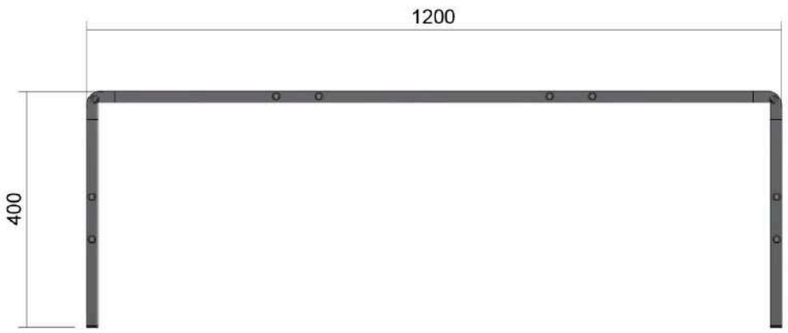

02

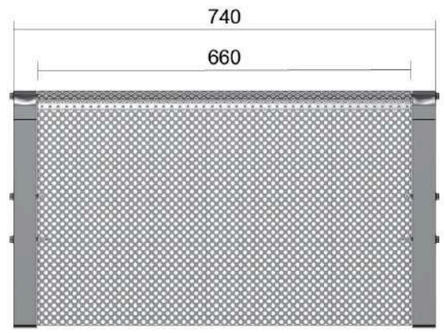

DETAILS

The ÉVIDÉ Coffee Table also features the same exposed bolted joints, reaffirming the aesthetic consistency with the rest of the collection, together with the perforated sheet metal that defines its character.
