chaır

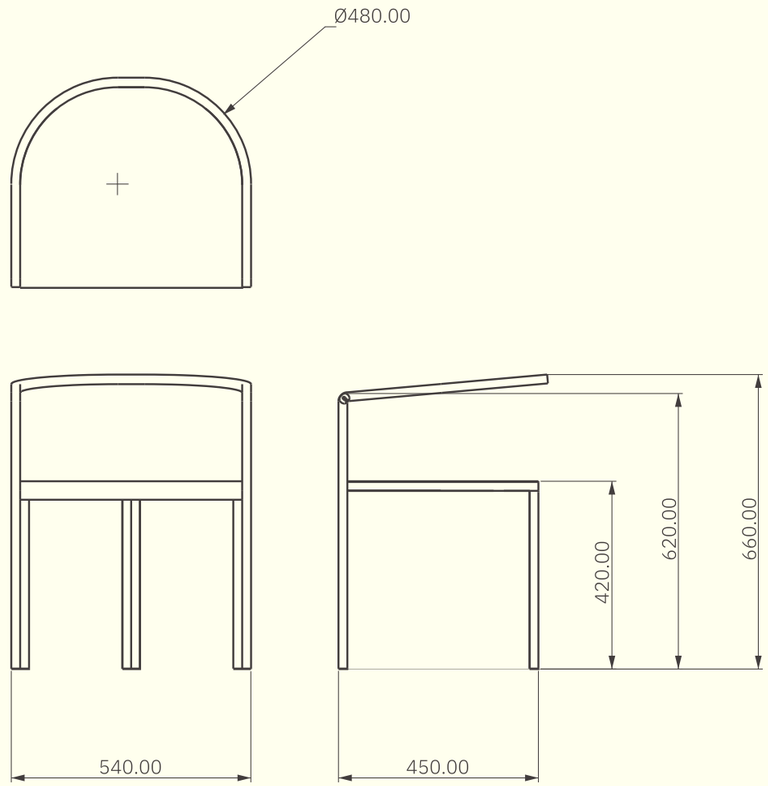

A balance between curves and straight lines.
The chair combines a strong, structured profile with subtle curves that gently embrace the user.
Its rigid geometry creates a sense of solidity, while the rounded elements soften the overall expression, creating a dialogue between two contrasting forms.

Color	Ral 050 50 20 milk coffee brown

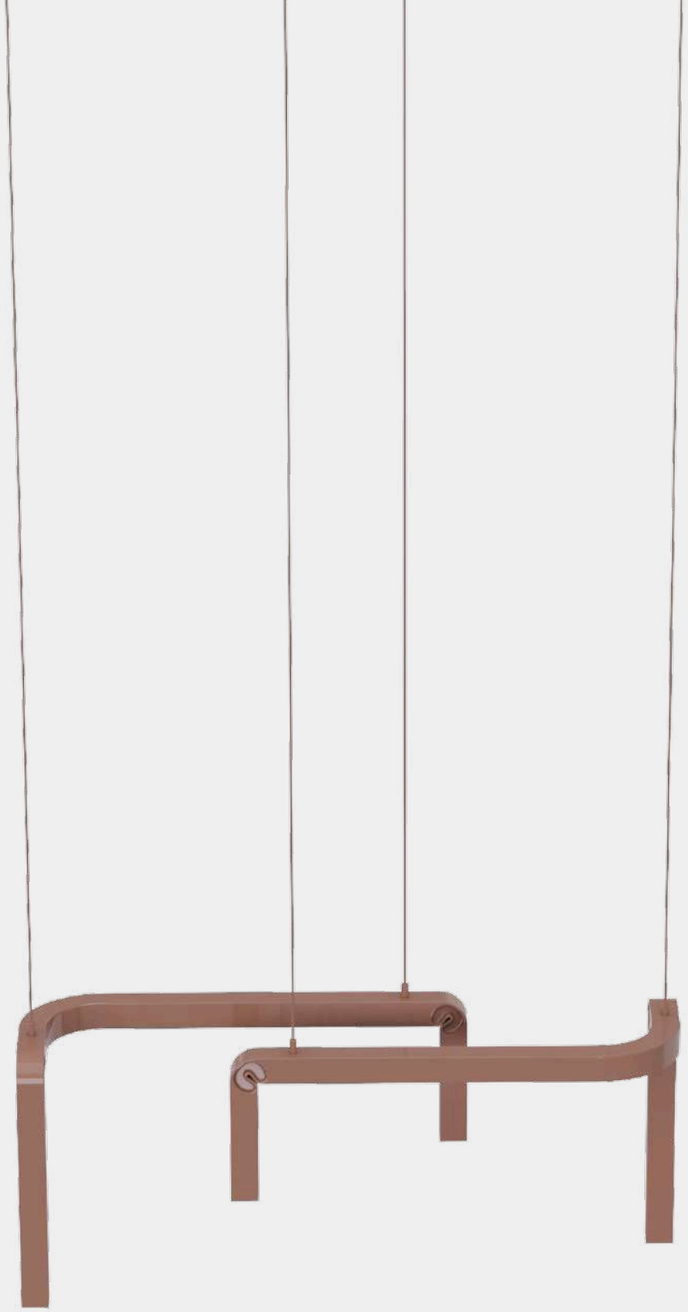

20 × 20 mm steel tube A
20 × 20 mm steel tube B
Rubber foot
20 × 20 mm structural profile
16 gauge sheet metal
20 × 20 mm steel tube C

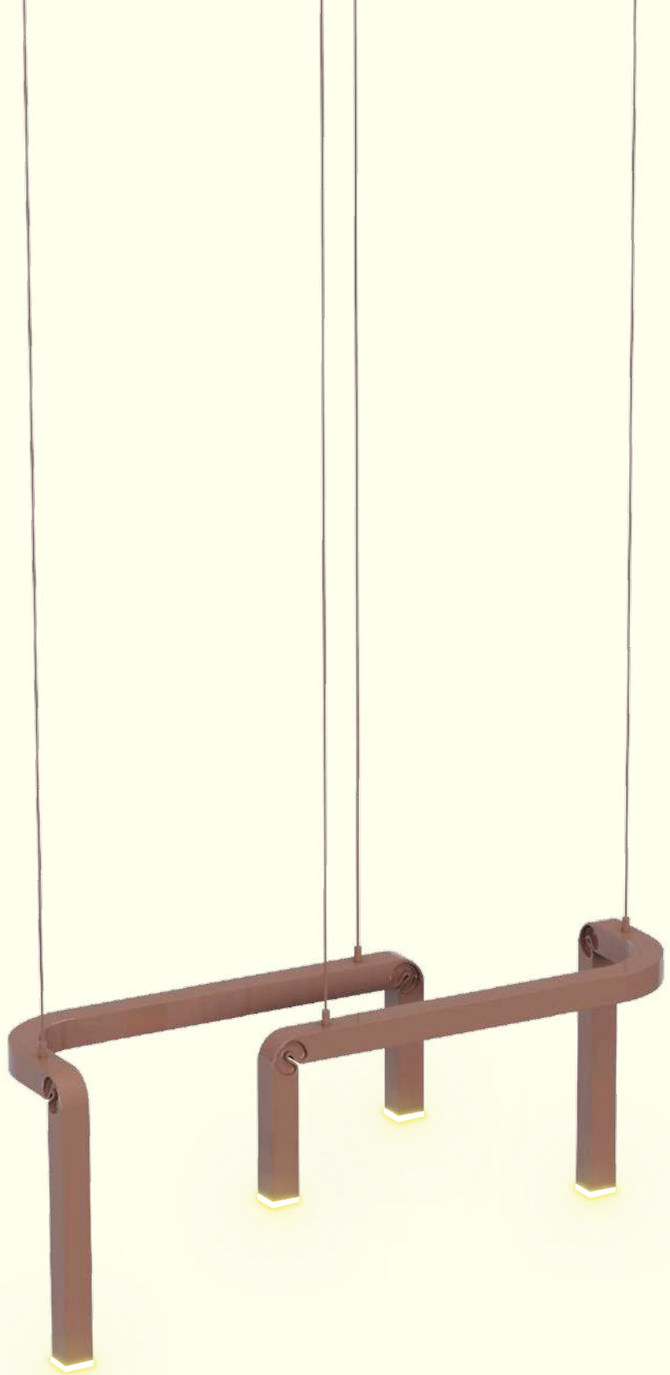

light

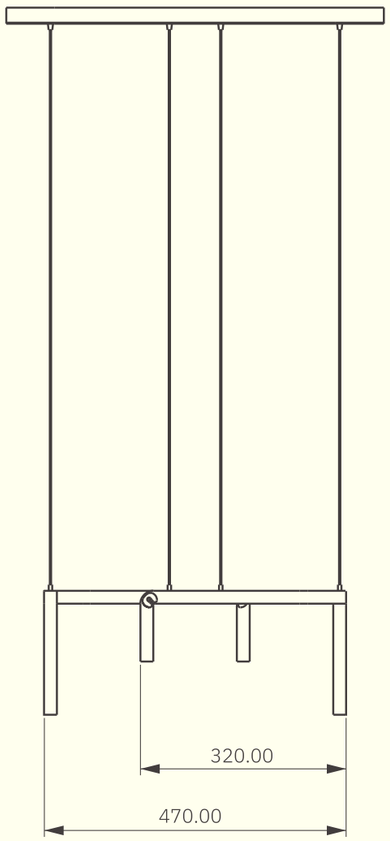

The lamp combines a strong linear structure with soft, rounded transitions. Its elongated horizontal profile creates a sense of continuity and order, while the curved joints introduce a subtle contrast that softens the overall expression. The suspended vertical elements reinforce the dialogue between horizontal and vertical lines, creating a balanced composition.

hook

The wall hook combines a strong, continuous profile with soft, rounded transitions. Its curved structure creates a fluid silhouette, while the straight inner sections provide contrast and definition. The repeated hook elements reinforce this dialogue between geometric and organic forms, resulting in a simple and functional composition.
