TV Sideboards

Sophisticated Metal Sheet Bending

Modern Fresh Colors

Poliedrico

Figurative (most common): Describes a person with many different talents, skills, or interests (like a "Renaissance man" or an eclectic artist).
Literal/Mathematics: Means polyhedral, relating to a polyhedron (poliedro), which is a 3D geometric shape with many flat faces.

Key Features

01 versatility

The 3 products are designed to be versatile, adaptable and easy to assemble, to create for creative spaces, offices or the home.

02 movability

Equipped with casters, all furniture is able to always freely move around.

03 individualize

All panels feature the same unified hole pattern, that allows for end-less individualization in between all modules.

04 unified T-beam

All products feature the same T-beam construction, to create strength and uniformity at the same time.

Measurements

PRODUCT 01 – UNITROLLEY

Overview

Adaptable to different needs

By removing the back panel the Unitrolley can be extended for larger shelf spaces. The back panel itself can be further utilized by adding hooks and side rests.

Separator Panels

Additional separator panels allow for a partitioning of the inner space.

Side Walls

The hole pattern in the side walls creates a seamless height adjustability for the shelves.
