Entracte

A reading corner in folded metal

We are asked to keep moving. Entracte is a place to stop.
A lounge chair, a small table and a light: three pieces that hold a single quiet moment, to sit, to set something down, to read. Each is drawn from the same angle, the one that tilts the chair’s back so you can settle in, and turns its corners with one detail, repeated without a weld, that lets metal fold and carry a soft edge.

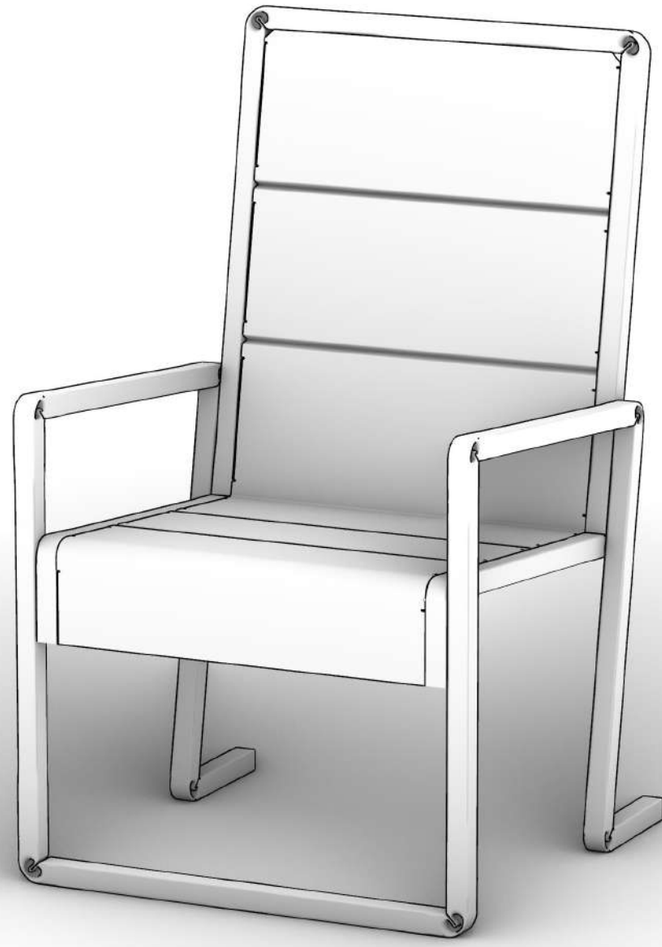

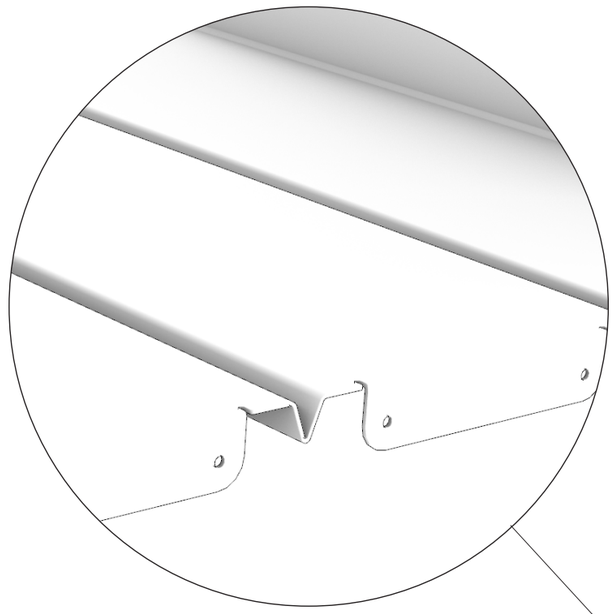

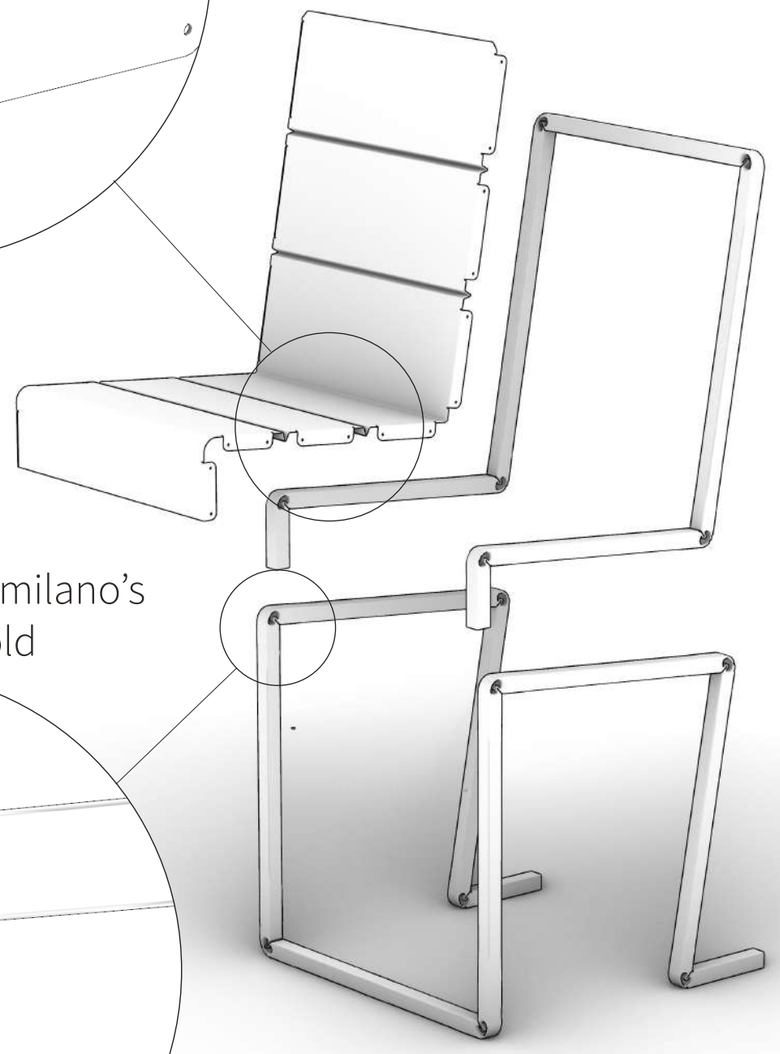

Lounge Chair
Assembly

The chair is made of three parts: two folded tubes and one folded sheet.

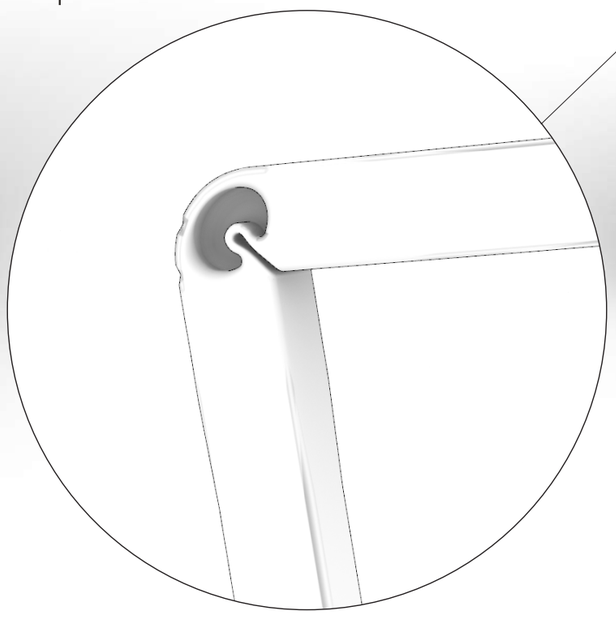

1.5 mm steel sheet; three folds stiffen the panel.

All corners use situér milano’s patented weld-free fold

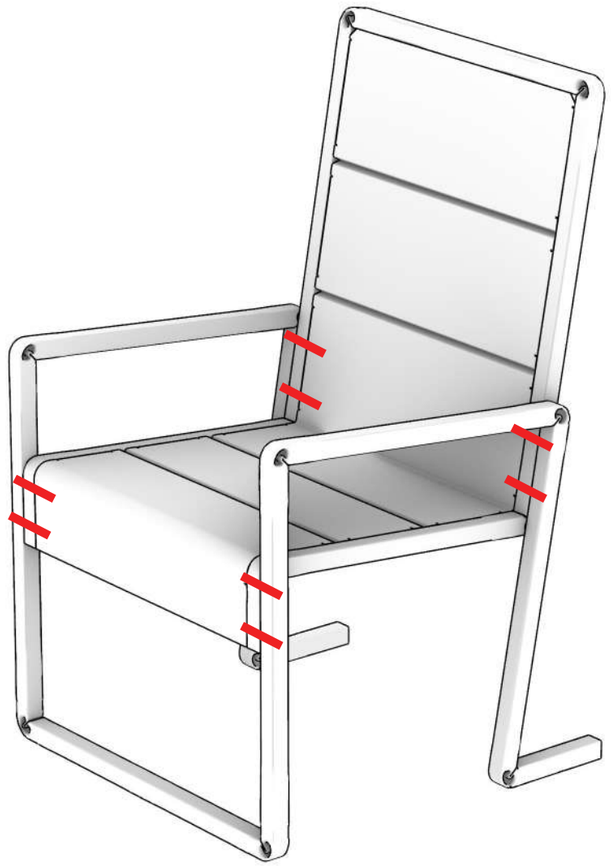

Lounge Chair
Assembly

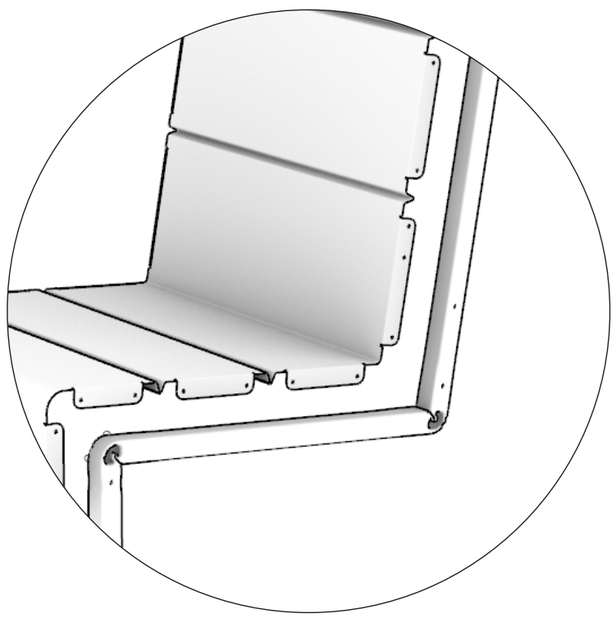

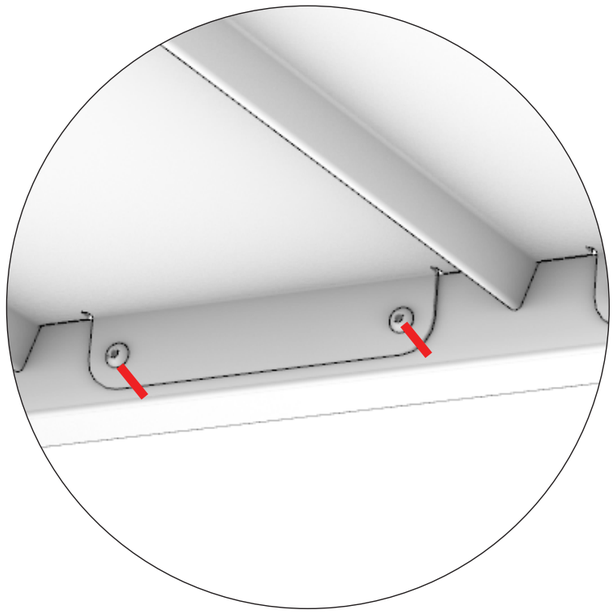

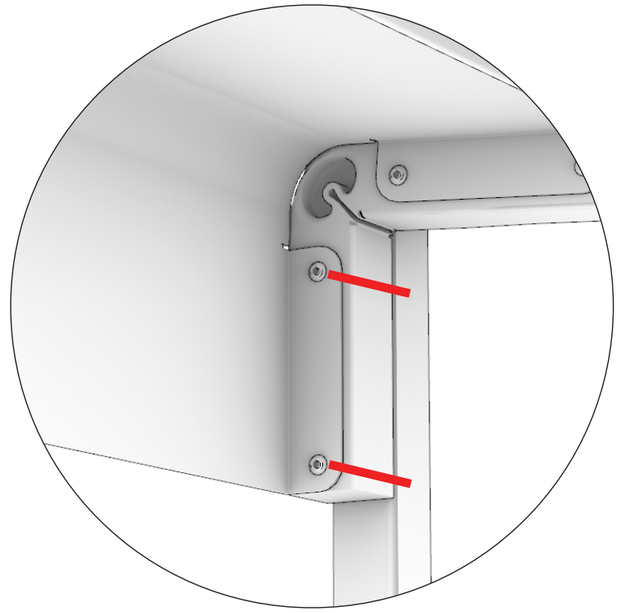

1: Fix the folded sheet to the upper frame with M6 screws into rivet nuts set in the tube.

2: assemble both the previous assembly with lower frame at for different points

Lounge Chair

Dimensions

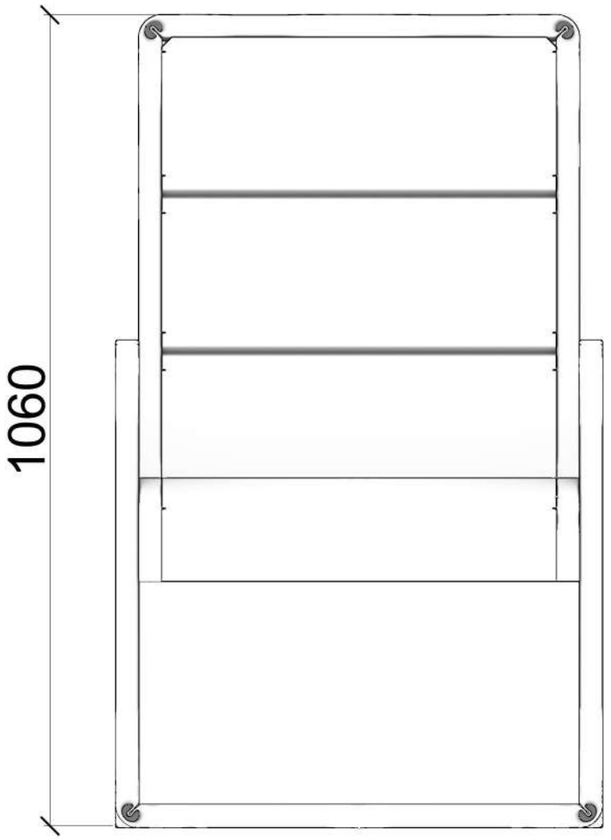

Steel tube 30*30*1.5mm and 1.5 mm steel sheet, epoxy powder coat 1000 / metallic and 7034 / metallic. Weld-free.
