Today, the citizen's relationship with the urban context is moving towards the spreading of new practices for the re-appropriation of public spaces all over the world. It is becoming clearer nowadays, that only the city that improves the quality of life of its inhabitants is truly smart, putting the human element at the centre of every urban project.

Whether you live in a metropolis or a small town, you have likely seen it for yourself. Cities around the world are implementing flexible, creative and light interventions to catalyse profound changes within the urban context.

Tactical Urbanism proposes an alternative method to achieve urban regeneration that works mainly at the small scale of a street, a block or a building. Similar to the way acupuncture inserts needles into one part of the body to boost the well-being of the entire organism, a "tactical" project can lead to positive changes in a whole neighbourhood.

The challenge of this competition is to encourage participants to imagine a city where public space goes beyond the traditional conception of a park, a square or a street. The idea is to experiment with new urban scenarios, which are able to promote social exchange, community activities and citizens interaction through the implementation of multifunctional designs. Use your imagination and propose a concept that takes urban space into another level, transforming it to become more playful, lively and welcoming.

Prizes & Mentions

- 1st Prize: 2.000€
- 2nd Prize: 1.000€
- 3rd Prize: 500€
- 2 Golden Mentions: 250€ each
- 10 Honourable Mentions

contemporary urban issues.

Requested Material

Competitors have to submit two A2 panels (42 x 59,4 cm) landscape oriented + a brief text describing the proposal (up to 250 words). Panels must contain all the necessary graphic information to explain the project in the best way possible (title, diagrams, sketches, 3D visualizations, plans and sections, collages, model photos, etc.). All kinds of graphic representations will be accepted.
