Today, the citizen’s relationship with the urban context is moving towards the spreading of **new practices for the re-appropriation of public spaces all over the world**. It is becoming clearer nowadays, that only the city that improves the quality of life of its inhabitants is truly smart, putting **the human element at the centre of every urban project**.

Whether you live in a metropolis or a small town, you have likely seen it for yourself. Cities around the world are implementing **flexible, creative and light interventions** to catalyze profound changes within the urban context.

Tactical Urbanism proposes an alternative method to achieve **an urban regeneration that works mainly at the small scale of a street, a block or a building**. Similar to the way acupuncture inserts needles into one part of the body to boost the well-being of the entire organism, a “tactical” project can lead to positive changes in a whole neighborhood.

The challenge of this competition is to encourage participants to **imagine a city where public space goes beyond the traditional conception of a park, a square or a street**. The idea is to experiment with new urban scenarios, which are able to promote **social exchange, community activities and citizens interaction** through the implementation of multifunctional designs. Use your imagination and propose a concept that takes urban space into another level, transforming it to become more playful, lively and welcoming!

Awards:-

- 1st PRIZE 2.000€
- 2nd PRIZE 1.000€
- 3rd PRIZE 500€
- 2 GOLDEN MENTIONS 250€ each
- 10 HONORABLE MENTIONS
