

Tactical Urbanism Now! #2021

TerraViva Competitions launches "TACTICAL URBANISM NOW! #2021", a new edition of the architecture competition that puts the focus on the transformation of contemporary public space.

BRIEF

Over the last decade, cities all around the world have experimented with a wide range of urban transformations through colourful, flexible and light interventions. Nowadays, it has become more and more common to come across these type of projects in both, small towns and metropolises.

Tactical Urbanism proposes an innovative design approach that aims to achieve long-term regeneration with short-term strategies. In certain cases, due to the positive impact that these interventions have generated in the urban realm, projects that were once thought of as temporary have now become permanent.

Working at the scale of a street, a block or a building, tactical tools have the power to improve liveability citywide. Similar to the way acupuncture inserts needles into one part of the body to boost the well-being of the entire organism, these type of projects can actually lead to positive changes in an entire neighbourhood.

GUIDELINES

The challenge of this competition is to reinterpret what is commonly known as traditional public spaces, such as parks, streets, playgrounds and squares, with a strategical vision capable of providing them with new features of multifunctionality and flexibility.

Tactical design can be considered as an instrument for carrying out experimental projects of high communicative value, aimed at improving public spaces or even creating new ones from scratch. Today, the challenge is to design inclusive and accessible spaces, capable of reflecting the diversity of the infinite categories of potential users and encouraging citizens to "Live Together".

Participants are therefore invited to explore and experiment with innovative strategies, original ideas and unconventional concepts. The key point is to be able to think out of the
